

Aerial view

The current shed is under the tree canopy in the garden to the left of the house (marked by a red cross). The proposed new location is marked by a yellow cross (the shed not being the size of the cross).

Shed application

The photo is of an apex roofed shed. We hope to get one of a similar design , once approval for a shed of the approximate dimensions 10 ft X 8ft base have been approved. A local shed supply company said the Apex of the roof would be about 92" and the edge of the roof about 70".
