

Trina 390W which have the dimensions 1754 x 1096mm and there is a 10mm gap between each panel.

Therefore, the solar array (in dark blue) will measure 12.338m from left to right and 2.252m from top to bottom.

The yellow line indicates 60cm from the edge of the roof, therefore all the panels are within that area.
