

67 Howard Drive, Letchworth

Proposed Alterations: Hardstanding Driveway.

Replace and widen driveway. The current driveway is too narrow to be useful to park. Proposal is to follow other driveway modifications made to neighbouring houses to allowing for two cars to park whilst maintaining over 50% soft landscaping to the frontage of the property.

Proposal is to use natural stone gravel bordered with grey edging driveway blocks to prevent over slip to highway and lawn.

Soakaway to be dug near proposed enclosed porch.

Relandscaped frontage to lawn with trees and hedges with ambient lighting

Proposed design: Aerial View
